Frequently Asked Questions

Who can participate?

The Fisher Science Education product portfolio is geared towards K-12 school districts, as well as community colleges. Universities, colleges, states, state agencies, counties, cities, nonprofits, and special districts are also eligible to participate should they be looking to purchase science education products.

Is there a fee associated with participating in the Fisher Science Education contract for science equipment and lab supplies made available through OMNIA Partners?

No, there are no costs or user fees to the public agency to adopt the contract.

How do I register to participate?

Complete the online registration on the OMNIA Partners website.

What is covered under the contract?

The contract covers all items in the Fisher Science Education portfolio, more than 20,000 products in total. The Fisher Science Education channel is a total lab solutions provider, serving K-12 science education, community college and undergraduate, and consumer markets. Our comprehensive portfolio of education products covers all science disciplines, including Chemistry, Biology, Physics, and Earth Science, and also includes emerging curriculum areas such as STEM, Biotechnology, Forensics, and Environmental Technology.

If my agency already has an account with the Fisher Science Education channel, do I need to set up a new account?

No. After working with your Fisher Science Education sales rep to adopt the contract, the pricing terms will be added to your existing account(s), meaning any orders your agency places will automatically receive the discount.

My state requires government agencies to bid everything. Can government agencies in my state use this program without going out to bid?

Yes. This contract has been competitively bid by a government agency. Through the Joint Powers Authority or an inter-local agreement, local governments can “piggy-back” on this competitive bid contract through OMNIA Partners, Public Sector. This satisfies the competitive bid requirements in most states. See state-by-state laws on intergovernmental purchasing.

Our agency has already negotiated a discount through the Fisher Science Education channel. Will I receive better pricing if we buy through the contract and the Fisher Science Education program?

Absolutely. The Fisher Science Education channel has made the commitment to OMNIA Partners, Public Sector (subsidiaries U.S. Communities and National IPA) that the discount provided on the contract for science supplies is the best contract discount we can offer to any school district nationwide

How do I know if my agency has already adopted the Fisher Science Education contract, available through OMNIA Partners, Public Sector, for science supplies?

Contact your local Fisher Science Education sales representative, or email us at omniapartners@thermofisher.com.
