ARE YOU DRESSED FOR SUCCESS?
COMPLEXITY IS SIMPLE AGAIN.

Contamination Control is complex. But it doesn’t have to be. With today’s standards and regulations, it’s challenging to determine where the breach really came from.

Cleanroom garments are one of the primary causes for contamination alerts. Just by adopting the right garment the potential for contamination decreases dramatically.

Just one cleanroom contamination event can be catastrophic for your company. The average cost of managing contamination events at a site is $3.1 million over the course of a year.

To avoid contamination we must look for its source:

People are the #1 cause of contamination in the cleanroom

Compromised cleanroom garments are one of the primary causes of alerts

---

1. Research by Kimberly-Clark PROFESSIONAL* and Hohenstein Institute
2. 2012 PDA Environmental Monitoring study
Kimtech* SMS (Spunbond/Meltblown/Spunbond) fabric provides strength, cloth-like comfort and a strong barrier for fine particles and liquids. Its middle layer act like filter which traps particles while maximising airflow to keep the wearer cool and comfortable. As the impact of gamma irradiation on the polymer occurs only one time, the properties are constant.

Laundered garments are subject to multiple wash, dry and gamma sterilisation cycles which deteriorates the material’s capability to filter particles and leads to higher risks of contamination. It’s not only important to review what comes off from the garment, but what also comes through the garment and can impact the environment. As the number of cycles (wash, dry, sterilisation) increase, the bacterial filtration efficiency continues to decline.
OUR SOLUTION

Kimtech* PURE A5 Sterile Cleanroom Coverall not only protects your processes but keeps your workers comfortable and safe:

- Advanced CLEAN-DON* Technology for easy and compliant aseptic donning
- Vacuum packed to enhanced sterility assurance (SAL 10-6)
- 95% Constant Bacterial Filtration Efficiency
- 250g Light and breathable cloth-like fabric
KIMTECH PURE* A5 STERILE CLEANROOM COVERALL WILL GET YOU DRESSED FOR SUCCESS!

Featuring CLEAN-DON* Technology for simple, safe and efficient aseptic gowning:

- Presented unzipped with inside-out fold
- Blue indicator line to avoid touching outside
- Arms and legs telescope folded with snaps

Enhanced Comfort and Protection:

- High performance breathable SMS fabric
- Waist and back panel elastics
- Elastics cuffs and built-in thumb loops

EU GMP ISO 5 Grade A cleanroom compatible:

- Low Lint Fabric, Helmke Drum test Category I
- Vacuum packed and double bagged for added sterility assurance.

Kimtech* Solutions and RightCycle* is the ideal combination to achieve your Business and Sustainability Goals

**Business**
- Efficiency
- No downtime

**Sustainability**
- Zero Waste
- Social impact

**KIMTECH® Products** offer:
- Consistent Quality
- Comfort
- Protection

**RightCycle® offers:**
- Easy collection of products
- No additional costs
- No waste

**Goals**

**Solution**

**Result**
- Improved productivity
- No hidden costs

> Responsible Manufacturer

**Sustainability Goals**

RightCycle® in Action

| Use Kimtech* Gloves and Apparel | Collect the waste | Waste is collected and stored | Gloves and Apparel will be recycled to new eco-friendly products | Caring for the environment |

Contact kimtech.support@kcc.com for a free consultation or find out more on our website www.kimtech.eu/sustainability

Availability of RightCycle® might vary by country. Send an email to kimtech.support@kcc.com to find out if it is available in your country. Only non-hazardous garments and gloves can be recycled. Bio-contaminated garments can be recycled after autoclaving.
