SECTION 1: Identification of the substance/mixture and of the supplier

Product name: Magnesium Nitrate, Lab Grade

Manufacturer/Supplier Trade name: Magnesium Nitrate, Lab Grade

Manufacturer/Supplier Article number: S25412A

Recommended uses of the product and restrictions on use:

Manufacturer Details:
AquaPhoenix Scientific, Inc
9 Barnhart Drive, Hanover, PA 17331
(717) 632-1291

Supplier Details:
Fisher Science Education
6771 Silver Crest Road, Nazareth, PA 18064
(724)517-1954

Emergency telephone number:
Fisher Science Education    Emergency Telephone No.: 800-535-5053

SECTION 2: Hazards identification

Classification of the substance or mixture:

- **Oxidizing**
  Oxidizing solids, category 3

- **Irritant**
  Eye irritation, category 2A

OxSolid 3
Eye Irritation 2

Signal word: Warning

Hazard statements:
May intensify fire; oxidizer
Causes serious eye irritation

Precautionary statements:
If medical advice is needed, have product container or label at hand
Keep out of reach of children
Read label before use
Do not eat, drink or smoke when using this product
Keep away from heat/sparks/open flames/hot surfaces. No smoking
Keep/Store away from clothing/combustible materials
Take any precaution to avoid mixing with combustibles
Wear protective gloves/protective clothing/eye protection/face protection
Wash skin thoroughly after handling
In case of fire: Use agents recommended in section 5 for extinction
IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses if present and easy to do. Continue rinsing
Magnesium Nitrate, Lab Grade

If eye irritation persists get medical advice/attention
Dispose of contents and container as instructed in Section 13

Other Non-GHS Classification:

Whmis

C

D2B

NFPA/HMIS

Health 2
Flammability 1
Physical Hazard 0
Personal Protection X

NFPA Scale (0-4)

HMIS Ratings (0-4)

SECTION 3: Composition/information on ingredients

Ingredients:

<table>
<thead>
<tr>
<th>CAS 13446-18-9</th>
<th>Magnesium nitrate hexahydrate</th>
<th>&gt;95 %</th>
</tr>
</thead>
</table>

Percentages are by weight

SECTION 4: First aid measures

Description of first aid measures

After inhalation: Loosen clothing as necessary and position individual in a comfortable position. Move exposed to fresh air. Give artificial respiration if necessary. If breathing is difficult give oxygen. Get medical assistance if cough or other symptoms appear.

After skin contact: Rinse/flush exposed skin gently using soap and water for 15-20 minutes. Seek medical advice if discomfort or irritation persists.

After eye contact: Protect unexposed eye. Rinse/flush exposed eye(s) gently using water for 15-20 minutes. Remove contact lens(es) if able to do so during rinsing. Seek medical attention if irritation persists or if concerned.

After swallowing: Rinse mouth thoroughly. Do not induce vomiting. Have exposed individual drink sips of water. Seek medical attention if irritation, discomfort or vomiting persists. Never give anything by mouth to an unconscious person.

Most important symptoms and effects, both acute and delayed:

Headache, Shortness of breath. Irritation- all routes of exposure. May gastrointestinal irritation, nausea, vomiting, and diarrhea;

Indication of any immediate medical attention and special treatment needed:
If seeking medical attention, provide SDS document to physician. Physician should treat symptomatically.

**SECTION 5 : Firefighting measures**

**Extinguishing media**

- **Suitable extinguishing agents:** Use water only!
- **For safety reasons unsuitable extinguishing agents:** Do NOT use dry chemicals, carbon dioxide, halon or foams

**Special hazards arising from the substance or mixture:**

- Thermal decomposition can lead to release of irritating gases and vapors. May react explosively with hydrocarbons

**Advice for firefighters:**

- **Protective equipment:** Use NIOSH-approved respiratory protection/breathing apparatus.
- **Additional information (precautions):** Move product containers away from fire or keep cool with water spray as a protective measure, where feasible. Use spark-proof tools and explosion-proof equipment. Avoid generating dust; fine dust dispersed in air in sufficient concentrations, and in the presence of an ignition source is a potential dust explosion hazard. Avoid inhaling gases, fumes, dust, mist, vapor, and aerosols. Avoid contact with skin, eyes, and clothing.

**SECTION 6 : Accidental release measures**

**Personal precautions, protective equipment and emergency procedures:**

- Wear protective equipment. Use spark-proof tools and explosion-proof equipment. Ensure that air-handling systems are operational. Ensure adequate ventilation.

**Environmental precautions:**

- Prevent from reaching drains, sewer or waterway. Collect contaminated soil for characterization per Section 13. Should not be released into environment.

**Methods and material for containment and cleaning up:**

- Wear protective eyeware, gloves, and clothing. Refer to Section 8. Always obey local regulations. Clean up spills immediately. Sweep up, then place into a suitable container for disposal. Remove all sources of ignition. Provide ventilation. Do not use combustible materials to clean up spill. Avoid dispersal of dust in the air (i.e., clearing dust surfaces with compressed air). Evacuate personnel to safe areas.

**Reference to other sections:**

**SECTION 7 : Handling and storage**

**Precautions for safe handling:**

- Minimize dust generation and accumulation. Follow good hygiene procedures when handling chemical materials. Refer to Section 8. Remove contaminated clothing and wash before reuse. Avoid contact with clothing and other combustible materials. Do not eat, drink, smoke, or use personal products when handling chemical substances. Avoid contact with eyes, skin, and clothing.

**Conditions for safe storage, including any incompatibilities:**

- Store away from incompatible materials. Protect from freezing and physical damage. Keep away from food and beverages. Provide ventilation for containers. Avoid storage near extreme heat, ignition sources or open flame. Store in cool, dry conditions in well sealed containers. Store with like hazards

**SECTION 8 : Exposure controls/personal protection**
Control Parameters: OSHA PEL TWA (Total Dust) 15 mg/m³ (50 mppcf*)
ACGIH TLV TWA (inhalable particles) 10 mg/m³

Appropriate Engineering controls: Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use/handling. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor or dusts (total/respirable) below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above. It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Ensure that dust-handling systems (such as exhaust ducts, dust collectors, vessels, and processing equipment) are designed in a manner to prevent the escape of dust into the work area (i.e., there is no leakage from the equipment). Use under a fume hood.

Respiratory protection: Not required under normal conditions of use. Where risk assessment shows air-purifying respirators are appropriate, use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. When necessary use NIOSH approved breathing equipment.

Protection of skin: Select glove material impermeable and resistant to the substance. Select glove material based on rates of diffusion and degradation. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Use proper glove removal technique without touching outer surface. Avoid skin contact with used gloves. Wear protective clothing.

Eye protection: Wear equipment for eye protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166(EU). Safety glasses or goggles are appropriate eye protection.

General hygienic measures: Perform routine housekeeping. Wash hands before breaks and at the end of work. Avoid contact with skin, eyes, and clothing. Before wearing wash contaminated clothing.

SECTION 9: Physical and chemical properties

Magnesium Nitrate, Lab Grade

Evaporation rate: Not determined  Decomposition temperature: 93.3°C / 199.9°F

Flammability (solid, gaseous): Not determined  Viscosity:
  a. Kinematic: Not determined
  b. Dynamic: Not determined

Density: Not determined
Specific Gravity: 1.46
Additional property: Hygroscopic

SECTION 10 : Stability and reactivity
Reactivity: Nonreactive under normal conditions.
Chemical stability: Deliquescent (tending to absorb atmospheric water vapor and become liquid). Stable at room temperature in closed containers under normal storage and handling conditions.
Possible hazardous reactions: None under normal processing
Conditions to avoid: Incompatible Materials. Dust generation. Excess heat
Hazardous decomposition products: Magnesium oxides, nitrogen oxides

SECTION 11 : Toxicological information
Acute Toxicity:
Oral: 13446-18-9  LD50 oral-rat: 5440 mg/kg

Chronic Toxicity: No additional information.
Corrosion Irritation: No additional information.
Sensitization: No additional information.
Single Target Organ (STOT): No additional information.
Numerical Measures: No additional information.
Carcinogenicity: No additional information.
Mutagenicity: No additional information.
Reproductive Toxicity: No additional information.

SECTION 12 : Ecological information
Ecotoxicity Persistence and degradability:
Bioaccumulative potential:
Mobility in soil:
Other adverse effects:

SECTION 13 : Disposal considerations
Waste disposal recommendations:
Contact a licensed professional waste disposal service to dispose of this material. Dispose of empty containers as unused product. Product or containers must not be disposed with household garbage. It is the responsibility of
the waste generator to properly characterize all waste materials according to applicable regulatory entities (US 40CFR262.11). Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. Chemical waste generators must also consult local, regional, and national hazardous waste regulations. Ensure complete and accurate classification.

**SECTION 14 : Transport information**

**UN-Number**
1474

**UN proper shipping name**
Magnesium Nitrate

**Transport hazard class(es)**

- **Class:**
  - 5.1 Oxidizing substances

- **Packing group:** III

**Environmental hazard:**

- Transport in bulk:

**Special precautions for user:**

**SECTION 15 : Regulatory information**

**United States (USA)**

- **SARA Section 311/312 (Specific toxic chemical listings):**
  - Reactive, Acute

- **SARA Section 313 (Specific toxic chemical listings):**
  - None of the ingredients is listed

- **RCRA (hazardous waste code):**
  - None of the ingredients is listed

- **TSCA (Toxic Substances Control Act):**
  - All ingredients are listed.

- **CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act):**
  - None of the ingredients is listed

**Proposition 65 (California):**

- **Chemicals known to cause cancer:**
  - None of the ingredients is listed

- **Chemicals known to cause reproductive toxicity for females:**
  - None of the ingredients is listed

- **Chemicals known to cause reproductive toxicity for males:**
  - None of the ingredients is listed

- **Chemicals known to cause developmental toxicity:**
  - None of the ingredients is listed

**Canada**

- **Canadian Domestic Substances List (DSL):**
All ingredients are listed.

**Canadian NPRI Ingredient Disclosure list (limit 0.1%):**

None of the ingredients is listed

**Canadian NPRI Ingredient Disclosure list (limit 1%):**

None of the ingredients is listed

### SECTION 16 : Other information

This product has been classified in accordance with hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations. Note: The responsibility to provide a safe workplace remains with the user. The user should consider the health hazards and safety information contained herein as a guide and should take those precautions required in an individual operation to instruct employees and develop work practice procedures for a safe work environment. The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by the use of this material. It is the responsibility of the user to comply with all applicable laws and regulations applicable to this material.

**GHS Full Text Phrases:**

**Abbreviations and acronyms:**

- IMDG: International Maritime Code for Dangerous Goods
- IATA: International Air Transport Association
- GHS: Globally Harmonized System of Classification and Labelling of Chemicals
- ACGIH: American Conference of Governmental Industrial Hygienists
- CAS: Chemical Abstracts Service (division of the American Chemical Society)
- NFPA: National Fire Protection Association (USA)
- HMIS: Hazardous Materials Identification System (USA)
- WHMIS: Workplace Hazardous Materials Information System (Canada)
- DNEL: Derived No-Effect Level (REACH)
- PNEC: Predicted No-Effect Concentration (REACH)
- CFR: Code of Federal Regulations (USA)
- SARA: Superfund Amendments and Reauthorization Act (USA)
- RCRA: Resource Conservation and Recovery Act (USA)
- TSCA: Toxic Substances Control Act (USA)
- NPRI: National Pollutant Release Inventory (Canada)
- DOT: US Department of Transportation
