SECTION 1 : Identification of the substance/mixture and of the supplier

Product name: Potassium Thiocyanate, 0.1M

Manufacturer/Supplier Trade name:

Manufacturer/Supplier Article number: S25872

Recommended uses of the product and uses restrictions on use:

Manufacturer Details:
AquaPhoenix Scientific
9 Barnhart Drive, Hanover, PA 17331

Supplier Details:
Fisher Science Education
15 Jet View Drive, Rochester, NY 14624

Emergency telephone number:
Fisher Science Education  Emergency Telephone No.: 800-535-5053

SECTION 2 : Hazards identification

Classification of the substance or mixture:

Hazard statements:
Harmful if swallowed
Harmful in contact with skin
Harmful if inhaled

Precautionary statements:
If medical advice is needed, have product container or label at hand
Keep out of reach of children
Read label before use

Other Non-GHS Classification:

WHMIS
NFPA/HMIS

SECTION 3 : Composition/information on ingredients

Ingredients:
**SECTION 4 : First aid measures**

**Description of first aid measures**

**After inhalation:** Remove to fresh air. Give artificial respiration if necessary. If breathing is difficult give oxygen. Get immediate medical attention. Do not use mouth-to-mouth. Move exposed individual to fresh air. Loosen clothing as necessary and position individual in a comfortable position. Seek medical advice if discomfort or irritation persists. If breathing difficult give oxygen.

**After skin contact:** Flush with water for 15 minutes. Get medical assistance if irritation develops. Wash affected area with soap and water. Rinse thoroughly. Remove contaminated clothing and wash before reuse or discard. Seek medical attention if irritation, discomfort, or vomiting persists.

**After eye contact:** Immediately flush eyes with water for at least 15 minutes. Immediately get medical assistance. Protect unexposed eye. Remove contact lens(es) if able to do so during rinsing. Seek medical attention if irritation persists or if concerned.

**After swallowing:** Do NOT induce vomiting. Dilute with water or milk. Get medical assistance. Rinse mouth thoroughly. Do not induce vomiting. Have exposed individual drink sips of water. Seek medical attention if irritation, discomfort, or vomiting persists.

**Most important symptoms and effects, both acute and delayed:**

**Indication of any immediate medical attention and special treatment needed:**

If seeking medical attention. Provide SDS document to physician.

---

**SECTION 5 : Firefighting measures**

**Extinguishing media**

**Suitable extinguishing agents:** If in laboratory setting follow laboratory fire suppression procedures. Use appropriate fire suppression agents for adjacent combustible materials or sources of ignition.

**For safety reasons unsuitable extinguishing agents:** Strong oxidizing agents, acids, and strong bases

**Special hazards arising from the substance or mixture:**

Combustion products may include carbon oxides or other toxic vapors. Thermal decomposition can lead to release of irritating gases and vapors. Avoid generating dust. Fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard.

**Advice for firefighters:**

**Protective equipment:** Use NIOSH-approved respiratory protection or breathing apparatus. Ensure adequate ventilation. Ensure eyewash and safety showers are available. If in laboratory setting follow laboratory fire suppression procedures.

**Additional information (precautions):** Use spark-proof tools and explosion-proof equipment. If feasible move product containers away from fire or keep cool with water spray as a protective measure.

---

**SECTION 6 : Accidental release measures**

**Personal precautions, protective equipment and emergency procedures:**

Wear protective equipment. Keep unprotected persons away. Ensure adequate ventilation. Keep away from ignition sources. Protect from heat. If possible stop the spill.

**Environmental precautions:**

---
Potassium Thiocyanate, 0.1M

Should not be released into environment. Prevent from reaching drains, sewer, or waterway. Collect contaminated soil for characterization per Section 13.

Methods and material for containment and cleaning up:
Sweep up and containerize for disposal. Avoid generating dust. Always obey local regulations. Dust deposits should not be allowed to accumulate on surfaces. Dust may form an explosive mixture if sufficient concentration is released into the atmosphere. Avoid dispersal of dust in the air. Do not clear dust on surfaces with compressed air. Place into properly labeled containers for recovery or disposal. If in a laboratory setting follow Chemical Hygiene Plan procedures. If necessary use trained response staff or contractor.

Reference to other sections:

SECTION 7 : Handling and storage
Precautions for safe handling:
Wash hands after handling. Avoid contact with skin and eyes. Avoid generation of dust or fine particulate. Avoid contact with eyes, skin, and clothing. Use only under a chemical fume hood. If in a laboratory setting follow Chemical Hygiene Plan. Minimize dust generation and accumulation. Routine housekeeping should be instituted to ensure that dusts do not accumulate on surfaces. Dry powders can build static electricity charges when subjected to the friction of transfer and mixing operations. Follow good hygiene procedures when handling chemical materials. Do not eat, drink, smoke, or use personal products when handling chemical substances. Use only in well ventilated areas.

Conditions for safe storage, including any incompatibilities:
Keep container tightly closed in a cool, dry, and well-ventilated area. Store in inert atmosphere. Store away from acids. Store away from foodstuffs. Keep away from food, beverages, and feed sources. Store in well sealed containers. Keep product and empty container away from heat and sources of ignition. Store away from oxidizing agents. Keep container tightly sealed.

SECTION 8 : Exposure controls/personal protection

Control Parameters:
No applicable occupational exposure limits

Appropriate Engineering controls:
It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents, an explosion suppression system, or an oxygen deficient environment. Use under a fume hood. Ensure that dust-handling systems (exhaust ducts, dust collectors, vessels, and processing equipment) are designed to prevent the escape of dust into the work area. Use only under a chemical fume hood. Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use or handling. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor or dusts below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above.

Respiratory protection:
Not required under normal conditions of use. Use suitable respiratory protective device when high concentrations are present. For spills respiratory protection may be advisable.

Protection of skin:
Chemical resistant gloves. Select glove material impermeable and resistant to the substance. Select glove material based on rates of diffusion and degradation.
Potassium Thiocyanate, 0.1M

Eye protection: Safety glasses with side shields or goggles.

General hygienic measures: Ensure adequate ventilation. Ensure eyewash and safety showers are available. The usual precautionary measures are to be adhered to when handling chemicals. Immediately remove all soiled and contaminated clothing. Wash hands before breaks and at the end of work. Avoid contact with the eyes and skin. Keep away from food, beverages, and feed sources. Do not inhale gases, fumes, dust, mist, vapor, and aerosols.

SECTION 10 : Stability and reactivity

Reactivity:
Chemical stability: Light sensitive. Moisture sensitive. Air sensitive. No decomposition if used and stored according to specifications.

Possible hazardous reactions: Contact with acids releases very toxic gases.

Conditions to avoid: Incompatible products, exposure to light, moist air, water, excess heat, and dust formation.

Incompatible materials: Strong oxidizing agents, acids, and strong bases.

Hazardous decomposition products: Carbon monoxide, carbon dioxide, nitrogen oxides, and sulfur oxides.

SECTION 11 : Toxicological information

Acute Toxicity:
Oral: ECHA LD50 oral-rat: 854 mg/kg

Chronic Toxicity: No additional information.

Corrosion Irritation: No additional information.

Sensitization: No additional information.
Potassium Thiocyanate, 0.1M

Single Target Organ (STOT): No additional information.
Numerical Measures: No additional information.
Carcinogenicity: No additional information.
Mutagenicity: No additional information.
Reproductive Toxicity: No additional information.

SECTION 12: Ecological information

Ecotoxicity
Ecotoxicity: Harmful to aquatic organisms. May cause long-term adverse effects in the aquatic environment. Do not release into the environment.
Persistence and degradability: Readily biodegradable. Readily degradable in the environment.
Bioaccumulative potential:
Mobility in soil:
Other adverse effects:

SECTION 13: Disposal considerations

Waste disposal recommendations:
Chemical waste generators must determine whether a discarded chemical is classified as a hazardous waste. Chemical waste generators must also consult local, regional, and national hazardous waste regulations. Ensure complete and accurate classification. Product/containers must not be disposed together with household garbage. Do not allow product to reach sewage system or open water. It is the responsibility of the waste generator to properly characterize all waste materials according to applicable regulatory entities (US 40CFR262.11). Consult federal state/provincial and local regulations regarding the proper disposal of waste material that may incorporate some amount of this product.

SECTION 14: Transport information

UN-Number
Not Regulated
UN proper shipping name
Not Regulated

SECTION 15: Regulatory information

United States (USA)
SARA Section 311/312 (Specific toxic chemical listings):
Acute
SARA Section 313 (Specific toxic chemical listings):
333-20-0 Potassium thiocyanate
Potassium Thiocyanate, 0.1M

RCRA (hazardous waste code):
None of the ingredients is listed

TSCA (Toxic Substances Control Act):
333-20-0 Thiocyanic acid, potassium salt (1:1)

CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act):
None of the ingredients is listed

Proposition 65 (California):
Chemicals known to cause cancer:
None of the ingredients is listed

Chemicals known to cause reproductive toxicity for females:
None of the ingredients is listed

Chemicals known to cause reproductive toxicity for males:
None of the ingredients is listed

Chemicals known to cause developmental toxicity:
None of the ingredients is listed

Canada

Canadian Domestic Substances List (DSL):
All ingredients are listed.

Canadian NPRI Ingredient Disclosure list (limit 0.1%):
None of the ingredients is listed

Canadian NPRI Ingredient Disclosure list (limit 1%):
None of the ingredients is listed

SECTION 16: Other information

This product has been classified in accordance with hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations. Note: The responsibility to provide a safe workplace remains with the user. The user should consider the health hazards and safety information contained herein as a guide and should take those precautions required in an individual operation to instruct employees and develop work practice procedures for a safe work environment. The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by the use of this material. It is the responsibility of the user to comply with all applicable laws and regulations applicable to this material.
