## Trisodium Phosphate,

### Indication of any immediate medical attention and special treatment needed:

If seeking medical attention provide SDS document to physician.

### SECTION 5 : Firefighting measures

#### Extinguishing media

**Suitable extinguishing agents:** Use water, dry chemical, chemical foam, or alcohol-resistant foam.

**For safety reasons unsuitable extinguishing agents:**

#### Special hazards arising from the substance or mixture:

#### Advice for firefighters:

**Protective equipment:** Wear protective eyewear, gloves, and clothing.

**Additional information (precautions):** Ensure adequate ventilation. Avoid contact with skin, eyes, and clothing.

### SECTION 6 : Accidental release measures

#### Personal precautions, protective equipment and emergency procedures:

Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use or handling. Use spark-proof tools and explosion-proof equipment.

#### Environmental precautions:

Should not be released into environment. Collect contaminated soil for characterization per Section 13 .

#### Methods and material for containment and cleaning up:

Sweep up and containerize for disposal. Avoid generating dust. Always obey local regulations. Collect liquids using vacuum or by use of absorbents. Place into properly labeled containers for recovery or disposal. Dust deposits should not be allowed to accumulate on surfaces, as these may form an explosive mixture if they are released into the atmosphere in sufficient concentration. Prevent further leakage or spillage if safe to do so. If necessary use trained response staff or contractor.

## Trisodium Phosphate,

<b>Control Parameters:</b>	10101-89-0, Sodium phosphate tribasic dodecahydrate, USA Workplace Environmental Exposure Levels (WEEL)
<b>Appropriate Engineering controls:</b>	It is recommended that all dust control equipment such as local exhaust ventilation and material transport systems involved in handling of this product contain explosion relief vents or an explosion suppression system or an oxygen deficient environment. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor and mists below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above.
<b>Respiratory protection:</b>	Not required under normal conditions of use. Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. Use NIOSH-approved respiratory protection or breathing apparatus.
<b>Protection of skin:</b>	Select glove material impermeable and resistant to the substance. Select glove material based on rates of diffusion and degradation.
<b>Eye protection:</b>	Safety glasses or goggles.
<b>General hygienic measures:</b>	Avoid contact with skin, eyes, and clothing. Wash hands and exposed skin with soap and plenty of water. Wash hands before breaks and immediately after handling the product. Remove contaminated clothing and shoes. Before wearing wash contaminated clothing.
