Safety Data Sheet
according to 29CFR1910/1200 and GHS Rev. 3

Effective date: 01.08.2015

Tert-Butyl Chloride

SECTION 1 : Identification of the substance/mixture and of the supplier

Product name: Tert-Butyl Chloride

Manufacturer/Supplier Trade name:

Manufacturer/Supplier Article number: S25672A

Recommended uses of the product and uses restrictions on use:

Manufacturer Details:

AquaPhoenix Scientific
9 Barnhart Drive, Hanover, PA 17331

Supplier Details:

Fisher Science Education
15 Jet View Drive, Rochester, NY 14624

Emergency telephone number:

Fisher Science Education    Emergency Telephone No.: 800-535-5053

SECTION 2 : Hazards identification

Classification of the substance or mixture:

Flammable liquids, category 2

Flammable Liquid 2

Signal word: Danger

Hazard statements:

Precautionary statements:
Keep away from heat/sparks/open flames/hot surfaces. No smoking
Use explosion-proof electrical/ventilating/light/equipment
Do not spray on an open flame or other ignition source
Keep/Store away from clothing/...combustible materials
Keep container tightly closed
Ground/bond container and receiving equipment
Use only non-sparking tools
Take precautionary measures against static discharge
Wear protective gloves/protective clothing/eye protection/face protection
IF ON SKIN (or hair): Remove/Take off immediately all contaminated clothing. Rinse skin with water/shower
In case of fire: Use agents recommended in section 5 for extinction
Store in a well ventilated place. Keep cool
Dispose of contents and container as instructed in Section 13

Other Non-GHS Classification:

WHMIS
SECTION 3: Composition/information on ingredients

Ingredients:

| CAS 507-20-0 | Tert-Butyl chloride | 100 % |

Percentages are by weight

SECTION 4: First aid measures

Description of first aid measures

**After inhalation:** Loosen clothing and place exposed individual in a comfortable position. Move exposed person to fresh air; if breathing is difficult, give oxygen. Give artificial respiration, if necessary. Seek medical attention if irritation persists or if concerned. Do not use mouth-to-mouth resuscitation

**After skin contact:** Remove all contaminated clothing. Rinse or flush skin/hair gently with water for at least 20 minutes. Wash hands and exposed skin with soap and plenty of water. Seek medical attention if irritation persists or if concerned

**After eye contact:** Protect unexposed eye. Rinse or flush eye gently with water for at least 15-20 minutes, lifting upper and lower lids. Remove contact lenses, if present, while rinsing. Seek medical attention if irritation persists or if concerned

**After swallowing:** Rinse mouth with water (never give anything by mouth to an unconscious person). Do not induce vomiting. Seek immediate medical attention. Contact a Poison Control Center.

Most important symptoms and effects, both acute and delayed:

May cause irritation, nausea, vomiting, diarrhea, central nervous system depression, unconsciousness, coma, and possible death. May cause irritation, chemical conjunctivitis, and corneal damage. May cause irritation, dermatitis, and cyanosis. May cause central nervous system effects, dizziness, aspiration leading to pulmonary edema, dizziness, suffocation or burning sensation. Irritation- all routes of exposure. Headache. Shortness of breath. Dizziness, light-headedness; Liver and kidney damage

Indication of any immediate medical attention and special treatment needed:

If seeking medical attention provide SDS document to physician. Physician should treat symptomatically
SECTION 5: Firefighting measures

Extinguishing media

Suitable extinguishing agents: Suitable agents for Class B fire (flammable gases/liquids) include carbon dioxide (CO2), dry chemical, or foam. Water, if immiscible with burning liquid and floats on its surface to prevent escape of vapor to atmosphere. Water, if flammable substance is soluble in water, as it acts to reduce rate of vaporization of flammable component. Suitable agents for Class D fire (metals) include water deluge, dry powder (graphite-based), or sodium chloride. Alcohol-resistant aqueous film-forming foam for polar solvents.

For safety reasons unsuitable extinguishing agents: Water may be ineffective. Do NOT use straight streams of water.

Special hazards arising from the substance or mixture:

Thermal decomposition can lead to release of irritating fine dusts, gases or vapors.

Advice for firefighters:

Protective equipment: Wear chemical protective clothing and positive pressure self-contained breathing apparatus (SCBA). Wear protective equipment. See Section 8.

Additional information (precautions): Avoid inhalation of vapor, mist, gases, fumes, dust or aerosols. Avoid contact with skin and eyes and clothing.

SECTION 6: Accidental release measures

Personal precautions, protective equipment and emergency procedures:

Keep away from heat, sparks, open flame, hot surfaces, or ignition sources. Use non-sparking equipment/tools. Ground/bond containers.

Environmental precautions:

Should not be released into the environment. Prevent from reaching soil, drains, sewer, or waterway.

Methods and material for containment and cleaning up:

Use non-sparking equipment/tools. Eliminate all sources of ignition if safe to do so. Wear protective equipment. See Section 8. Always obey local regulations. Avoid contact with skin, eyes and clothing. Soak up with inert absorbent material and characterize for proper disposal (likely characteristically hazardous as flammable). See Section 13. Containerize for disposal; keep well sealed and properly labeled.

Reference to other sections:

SECTION 7: Handling and storage

Precautions for safe handling:

Keep away from heat, sparks, open flame, hot surfaces, or ignition sources. Ground/bond container and receiving equipment. Avoid contact with skin, eyes and clothing. Follow good hygiene procedures when handling chemical materials. Refer to Section 8. Do not eat, drink or smoke in work areas.

Conditions for safe storage, including any incompatibilities:

Store in Flammables cabinet or designated area without combustible materials (cardboard, cloth, paper, etc.). Keep cool. Storage area should be vented or well-ventilated. Keep from freezing or physical damage. Store away from incompatible materials (see Section 10). Keep away from sources of ignition - No smoking.

SECTION 8: Exposure controls/personal protection
Control Parameters: No applicable occupational exposure limits

Appropriate Engineering controls: Emergency eye wash fountains and safety showers should be available in the immediate vicinity of use or handling. Provide exhaust ventilation or other engineering controls to keep the airborne concentrations of vapor and mists below the applicable workplace exposure limits (Occupational Exposure Limits-OELs) indicated above. Use under fume hood designed for hazardous chemicals with an average face velocity of 100 feet per minute or greater.

Respiratory protection: Not required under normal conditions of use with adequate ventilation. Where risk assessment shows air-purifying respirators are appropriate use a full-face particle respirator type N100 (US) or type P3 (EN 143) respirator cartridges as a backup to engineering controls. When necessary use NIOSH approved breathing equipment.

Protection of skin: Select glove material impermeable and resistant to the substance. Select glove material based on rates of diffusion and degradation. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Use proper glove removal technique without touching outer surface. Avoid skin contact with used gloves. Wear protective clothing.

Eye protection: Wear equipment for eye-protection tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU). Wear safety glasses with side-shields or safety goggles as eye protection.

General hygienic measures:

SECTION 9: Physical and chemical properties

<table>

SECTION 10: Stability and reactivity

Reactivity: Nonreactive under normal conditions.
Chemical stability: Stable under normal conditions
Possible hazardous reactions: None under normal processing
Conditions to avoid: Heat, sparks, open flame, hot surfaces, and ignition sources. Direct sunlight on containers. High temperatures. Incompatible materials
Incompatible materials: Strong oxidizers and bases
Hazardous decomposition products: Oxides of carbon, hydrogen chloride

SECTION 11: Toxicological information

<table>

Sensitization: No additional information.

Single Target Organ (STOT): No additional information.

Numerical Measures: No additional information.

Carcinogenicity: EPA: EPA classifies this chemical as D - not classifiable as to human carcinogenicity. The cancer weight of evidence classification is based on all routes of exposure.

Mutagenicity: No additional information.

Reproductive Toxicity: No additional information.

SECTION 12: Ecological information

Ecotoxicity Persistence and degradability:

Bioaccumulative potential:

Mobility in soil:

Other adverse effects:

SECTION 13: Disposal considerations

Waste disposal recommendations:
Discarded material or residues in containers should be characterized for disposal considering flammable nature of substance(s). Contact a licensed professional waste disposal service to dispose of this material. Dispose of empty containers as unused product. Product or containers must not be disposed with household garbage. It is the responsibility of the waste generator to properly characterize all waste materials according to applicable regulatory entities (US 40CFR262.11). Chemical waste generators must determine whether a discarded
chemical is classified as a hazardous waste. Chemical waste generators must also consult local, regional, and national hazardous waste regulations. Ensure complete and accurate classification.

### SECTION 15 : Regulatory information

**United States (USA)**
- **SARA Section 311/312 (Specific toxic chemical listings):**
  - Acute, Fire
- **SARA Section 313 (Specific toxic chemical listings):**
  - None of the ingredients is listed
- **RCRA (hazardous waste code):**
  - None of the ingredients is listed
- **TSCA (Toxic Substances Control Act):**
  - All ingredients are listed.
- **CERCLA (Comprehensive Environmental Response, Compensation, and Liability Act):**
  - None of the ingredients is listed

**Proposition 65 (California):**
- **Chemicals known to cause cancer:**
  - None of the ingredients is listed
- **Chemicals known to cause reproductive toxicity for females:**
  - None of the ingredients is listed
- **Chemicals known to cause reproductive toxicity for males:**
  - None of the ingredients is listed
- **Chemicals known to cause developmental toxicity:**
  - None of the ingredients is listed

**Canada**
- **Canadian Domestic Substances List (DSL):**
  - All ingredients are listed.
- **Canadian NPRI Ingredient Disclosure list (limit 0.1%):**
None of the ingredients is listed

**Canadian NPRI Ingredient Disclosure list (limit 1%)**:
None of the ingredients is listed

### SECTION 16 : Other information

This product has been classified in accordance with hazard criteria of the Controlled Products Regulations and the SDS contains all the information required by the Controlled Products Regulations. Note: The responsibility to provide a safe workplace remains with the user. The user should consider the health hazards and safety information contained herein as a guide and should take those precautions required in an individual operation to instruct employees and develop work practice procedures for a safe work environment. The information contained herein is, to the best of our knowledge and belief, accurate. However, since the conditions of handling and use are beyond our control, we make no guarantee of results, and assume no liability for damages incurred by the use of this material. It is the responsibility of the user to comply with all applicable laws and regulations applicable to this material.

**GHS Full Text Phrases:**

**Abbreviations and acronyms:**
- IMDG: International Maritime Code for Dangerous Goods
- WHMIS: Workplace Hazardous Materials Information System (Canada)
- DNEL: Derived No-Effect Level (REACH)
- PNEC: Predicted No-Effect Concentration (REACH)
- CFR: Code of Federal Regulations (USA)
- SARA: Superfund Amendments and Reauthorization Act (USA)
- RCRA: Resource Conservation and Recovery Act (USA)
- IATA: International Air Transport Association
- DOT: US Department of Transportation
- GHS: Globally Harmonized System of Classification and Labelling of Chemicals
- ACGIH: American Conference of Governmental Industrial Hygienists
- CAS: Chemical Abstracts Service (division of the American Chemical Society)
- NPRI: National Pollutant Release Inventory (Canada)
- NFPA: National Fire Protection Association (USA)
- HMIS: Hazardous Materials Identification System (USA)
