

## Solutions for COVID / Lab testing

With organizations opening and increasing capacity, new challenges are more prevalent than ever. From sizeable organizations like schools, sports teams, etc. trying to figure out the best, most efficient way to test their folks or labs dealing with increased requests for processing, there are new challenges that are being faced each day. It is paramount to have a plan to handle these tests efficiently but also have access to these solutions and products.

Brady knows that every sample is a person you want to help keep safe. As you up your testing, up your confidence with customized solutions, including printing systems, materials, absorbent pads and more, that can meet the needs of your organization, including:

- Shipping to CDC Regulations Touchless printing
- Long-term traceability for collection and testing
- On-demand ID labels
- Touchless printing

And, look at these real-world solutions that Brady offers organizations like yours:

## Shipping to CDC Regulations

**Need:** Meet CDC Category B UN3373 Regulation

**Solution:** When you need to ship samples – COVID-19 patient specimens, cultures, isolates – ship the right way. Because they're a biohazard, the CDC requires that the primary container holding the sample gets wrapped in an absorbent material. It's not only called out in the [Category B UN3373 regulation](#), but is also mandatory material on the packaging checklist.

## Long-term Traceability for Collection and Testing

**Need:** Traceable samples that will last

**Solution:** Great for lab conditions and ID on vials, centrifuge tubes and test tubes. Brady's B-7425 and B-492 are great material options that will stand up to the testing processes and different environments the samples will be exposed to.

## On-demand and Touchless ID Printing

**Need:** Allow individuals to test themselves and/or create labels on the spot

**Solution:** Between the multiple printer, scanner, and software options available, Brady has the ability to create a solution specific to each organization's needs.
