Thermo Scientific Heratherm
large capacity microbial incubators –
safe, easy, efficient

Thermo Scientific™ Heratherm® large capacity microbial incubators are the right choice for large samples or high sample volume.

General Protocol units with gravity convection minimize drying out of samples. Advanced Protocol Security models with mechanical convection technology provide outstanding temperature performance to ensure fully reproducible results.

750 L | 400 L
**Thermo Scientific Heratherm 400 L and 750 L Large Capacity Incubators**

**safe, easy, efficient**

**Heratherm**

**General Protocol Incubators**

- Two sizes (400 L and 750 L)
- Gravity convection technology with unique airflow has been developed to minimize drying out of samples
- Optimal use of chamber with flexible shelving system and lockable castors for easy set-up / moving

**Ease of use**

- Easy temperature setting with intuitive user interface
- Large vacuum fluorescent display for easy reading
- Simple calibration routine

**Optional stainless steel exterior for Advanced Protocol Security units**

- Meets demanding needs in pharmaceutical and clinical laboratories

**Heratherm**

**Advanced Protocol Security Incubators**

- Mechanical convection technology ensures optimal temperature distribution with improved level of temperature uniformity: ± 0.2 to 0.3 °C
- Temperature range from ambient +5 °C to 105 °C for application flexibility: units can even be used for drying applications
- Unique 140 °C decontamination cycle, eliminating the need for separate autoclaving or use of toxic decontaminants

**Safety**

- Optimal temperature performance to protect your valuable samples
- Automatic overtemperature alarm
- Safe view of samples through internal glass door without impact on temperature

**LARGE CAPACITY GENERAL PROTOCOL INCUBATORS**
