AnsellGUARDIAN Assessment

AnsellGUARDIAN is a sitewide safety solutions assessment performed by Ansell safety experts, tailored for your business to help drive down costs, reduce complexity, and improve operational efficiency.

About

Ansell's simple and clear processes focus on the most relevant areas to deliver their best practice recommendations for one application or even an entire site. Every customer is different, and so are their safety needs. Over 600 Ansell safety experts assess each situation individually, using the data provided and their proven process. This results in a unique, tailor-made site-wide safety solutions assessment to meet your objectives.

Ansell safety experts support the full implementation of your assessment with samples and education for your workers to ensure the success of personal protective equipment (PPE) change management. They start the partnership by analyzing, benchmarking, implementing, and improving your PPE-related operations and performance. One assessment at a time, they assess your current and future safety needs.

Key Benefits

AnsellGUARDIAN™ assessments lead to injury and cost reductions, increased compliance, and PPE portfolio complexity reduction.

- Personalized risk management solution leads to improved worker safety, injury reduction, and increased regulatory compliance
- Business performance improvements result in lower overall costs for your company
- Best practice recommendations optimize your PPE dispensing, improve your company's output, eliminate waste, and increase productivity
