Protecting What Matters Most

## Training

### Electrical Safety

#### Low-Voltage Qualified Course

A one-day course based on current NFPA 70E and OSHA regulations. This is required training for employees performing electrical work on equipment under 600 volts. Attendees learn safe practices necessary for working around electrical hazards.

#### About

e-Hazard's electrical safety trainers have extensive field experience working around electricity and understand the dangerous nature of the work and the life-saving protection strategies available today. They also have a passion for sharing their knowledge to keep workers safe.

Our training goes beyond minimum requirements to emphasize industry best practices in electrical safety. Workers learn practical strategies and how to apply them in real-world situations. Instructors also have the flexibility to tailor training to the needs of the organization and students to ensure success.

#### Key Benefits

This course helps employers maintain training compliance and furthers their safety initiatives to reduce incidents and worker injuries. Areas covered include:

- PPE requirements
- Critical aspects of job planning
- Risk assessment strategies
- Recognizing electrical hazards
- Steps for creating an "electrically safe work condition"
