Honeywell Safety Confined Space Entry, Rescue, and Train-the-Trainer Combo Training

Designed to instruct participants on how to teach and develop their own confined space training program for their workplace. It teaches skills and offers an in-depth review of regulations from 29 CFR 1910.146 Subpart J - Permit Required Confined Spaces.

About

This four-day course includes a 16-hour Confined Space Entry, 8-hour Confined Space Rescue, and 8-hour Confined Space Train-the-Trainer at a discounted combo price.

Confined Space Entry is an entry-level course for individuals responsible for confined space entry, planning, supervising, or administrating employees working in confined spaces in both general industry and construction.

Confined Space Rescue is an industrial safety course that develops and/or upgrades students in their industrial skills necessary for a competitive environment. A review of the Confined Space OSHA regulations, rescue regulations, and application of various confined space entry/rescue equipment with hands-on rescue skill training are included.

Confined Space Train-the-Trainer instructs students on how to teach and develop a confined space training program for their place of employment. This course teaches skills and includes an in-depth review of regulations from 29 CFR 1910.146 Subpart J.

Key Benefits

- Taught by trained, educated, and experienced subject matter experts
- Leading PPE manufacturer with extensive behavior-based safety training courses
- Meets regulatory compliances
- Hands-on training
- Three-year certification (annual training required for Confined Space Rescue)
- Open enrollment or on-site training options
- Courses offered separately
