Contamination Control

The APEX™ Program by Kimberly-Clark Professional

Trust this multi-step approach, including site assessment, training, and post-implementation support, to help ensure proper contamination control with Kimberly-Clark Professional™ WypAll™ and Kimtech™ Wipers.

About

Change can be disruptive, especially in environments where personal hygiene and contamination control are essential. That's why Kimberly-Clark developed the APEX™ Program, a consultative approach that ensures a seamless transition when introducing new cleaning materials such as wipers in your facility.

Based on over 60 years of industry expertise in delivering innovative solutions for critical environments, APEX by Kimberly-Clark Professional ensures that both people and the important work they do are protected.

This four-pronged approach includes assessment, preparation, implementation, and post-implementation support. The APEX™ Service covers everything from site surveys, application assessments, and standard operating procedure (SOP) reviews to best practices and training. All of this can be conducted virtually or in person at your site location.

When it comes to managing change, you can trust Kimberly-Clark Professional and the APEX™ Program to make it both seamless and worry-free.

Key Benefits

- Assess processes, equipment, and chemical usage
- Prepare success criteria, inventory plan, and SOP updates
- Implement with training and visual management
- Measure results
