Fall Protection

Safety at Heights Training

MSA helps you stay compliant with their extensive offering of fall protection training courses designed for various applications. These courses are taught by MSA factory-trained technicians.

About

Training courses are a mix of hands-on and classroom instruction to maximize the training experience. Attendees will receive an instruction training manual and supporting documentation along with a certificate of completion once the course is completed.

The courses offered include fall protection awareness, rescue planning, and a variety of competent person applications, as well as many others that address the specialized training needed for working at heights. These training courses are designed for the industry and are not limited to only MSA products but include all applicable solutions.

Key Benefits

- Extensive course offering
- Hands-on learning
- State-of-the-art training facilities
- Experienced, certified instructors
- Drives customer compliance
